

The future is now...

Keeping your people and your data connected has never been more important. EchoStar Mobile delivers reliable, affordable solutions that can provide your business with the connectivity you need to make sure your people and your devices can communicate across Europe. Built on the extensive satellite capability of EchoStar and the market leading technology of Hughes, our Mobile Satellite Services have a rich heritage of delivering innovation at an affordable price.

EchoStar Mobile Advantage™

Creating critical connections

Our EchoStar Mobile Advantage™ service is designed to support you by delivering reliable, redundant communications to the people and places that require it. Highly portable, Advantage services are ideal for use in locations where terrestrial connectivity is not readily available or reliable.

This best-of-breed, Mobile Satellite Service provides resilient coverage by leveraging S-band satellite spot beams and the extensive capabilities of our Hughes 4200 PDT. Connectivity is ensured even in the event your terrestrial network fails.

Give your business the advantage, with an affordable, reliable and scalable MSS solution that will meet your critical demands across the hardest-to-reach locations.

Features...

- Comms on the Pause
- Quality of Service
- Configurable streaming speed
- Native Voice

EchoStar Mobile Momentum™

The smarter way to connect

EchoStar Mobile Momentum™ services are ideal if you're looking for an affordable and reliable option for fixed or mobile IP data connectivity. Momentum services will help you keep an always-on connection to remote sites that are regularly reporting critical M2M data. With pricing packages designed with ultra low billing increments, this solution is ideally placed to serve the needs of M2M. And with the ability to deliver connectivity to mobile assets that are constantly on the move, this service is also great for keeping distributed teams and resources connected too.

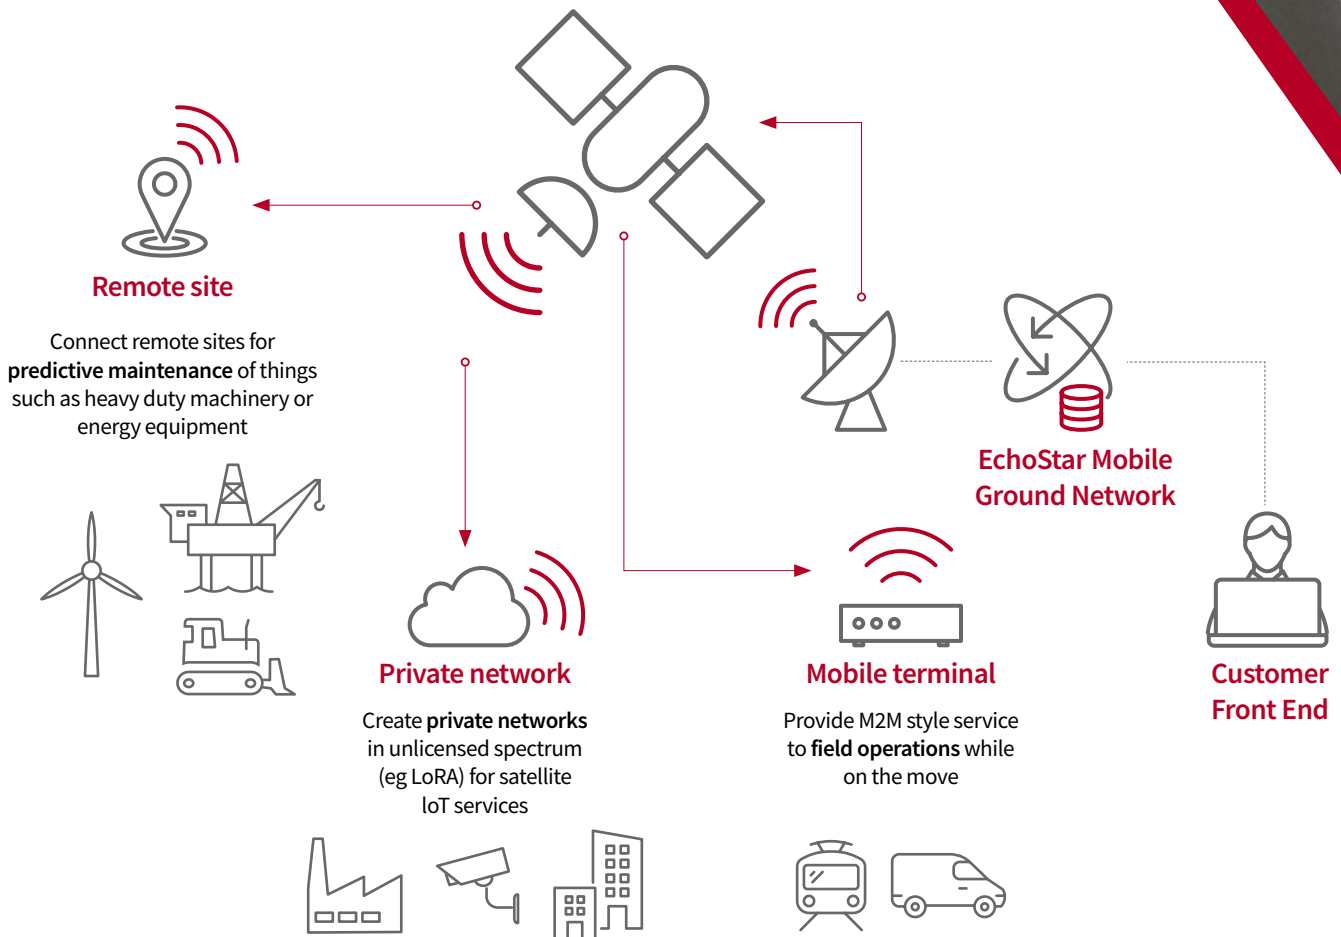

Keep your communications moving with our easily implemented, powerful and affordable EchoStar Mobile Momentum™ services.

Versatile, reliable, affordable connectivity

With a multipurpose terminal that can be mounted to a fixed location or to a mobile unit and flexible pricing packages to meet specific needs on a per site basis, the Momentum solution provides the connectivity you need to meet the demands of the modern distributed business.

Features...

- Comms on the Move
- Comms on the Pause
- Remote FW Upgrade
- Remote terminal Management

Satellite Facts:

- State-of-the-art S-band satellite
- MSS satellite with Ka-band feeder links
- Located at 10.25°E
- Designed with an 18-metre antenna reflector, enabling use of smaller antennas for mobile services, including PPDR, M2M and IOT
- Owned and operated by a division of the U.S.-based EchoStar Mobile parent company, EchoStar Corporation
